Did you Remember to change the batteries in your smoke Alarms?????

Every year when you change your clocks, you should change the batteries in your smoke alarms as well. If you have not done this yet, now is the time!

In today's homes, a fire can reach its most destructive point in just over 3 minutes. "Flash Over", is the point when temperatures in a smoke layer get hot enough and the smoke layer gets low enough that everything in the room ignites. Even before the point of flashover, deadly smoke is produced and quickly fills the home. Early detection is imperative in escaping a home fire. In Ontario, a working smoke alarm must be installed on every level of a home, including the basement and outside sleeping areas..... IT'S THE LAW!
